TUESDAY, Dec. 9-P. M. There was a dull Stock market to-day, with generally a downward tendency in the fancies. At the first Board, however, Reading was buoyant, and went to 61; it afterward receded and went to 61, closing heavy. Erie was without important change, closing at about 881, with moderate sales. Norwich was firm, and closed rather better than it epened. Harlem was heavy. Zinc was without change. Delaware improved 1 P cent. Hudson River was lower-the business is larger than it was ; the receipts on Saturday were \$1,100. Virginia 6s sold at 1071, and more were wanted, but none of fered below 108. Governments were in large de-

1807s. There was an inquiry on foreign account. In Sterling the market closed dull, with a moderate supply. The rates are 101@104, the closing sales being at 10; for good names. There was a new drawer in market, and some small supply of Southern bills. Southern Sterling sold 91 @91, and Francs at 5 16; City Francs, 5.15 @5.13; The business was not very large.

mand, and advanced 1 P cent., selling at 116 for

There is a firm market for Freights, but not much activity. Engagements for 7,500 bushels Wheat, at 4d.; Flour, 131@15d., the latter asked. 1,000 boxes Cheese, 20s. ; dead weight, 14s. 6d.@15s. There is a considerable quantity of Cotton offering, at 3-16d., and some 1,800 bales taken at that price, which was afterward declined. To London, 2,000 bbis. Turpentine, at 2s. 3d.; 1.500 boxes Cheese, at 35s. To Havre, the packet of the 16th has Cotton at le. ; Ashes, Bark, &c., at \$6@\$7 ; and 500 bbls. Re sin at 50c. The steamer has 100 bales Hops at ic. To Glasgow, about 400 bbls. bulk was engaged at 22s. 6d.

There is no marked change in money. The supply on call is good, and on first-class securities teans are moderate at 6 27 1) cent. The supply of good paper is moderate, and the demand is good at 7@10 P cent. The banks are discounting all the good paper offering, but the demand for money from the mercantile community is not large.

There is an improved demand for Railsoad Ronds of the best class, and considerable fransactions take place daily. Investors, however, are very cautious, and none but those perfectly secured are salable.

Land warrants are selling at \$140@\$150 for 160 acres. There is something doing in the warrants under the new bill, at about 50 cents P acre on speculation. They will doubtless be made assignable at the present session of Congress.

The steamer from Boston to-morrow will take probably \$300,000 in specie, Also to a larger amount than usual of late, Federal and State Stocks, and City, Country and Railroad Bonds. Some of the leading foreign houses, by means of circulars are doing much to give a better knowledge of our securities to foreign capitalists, and the result will probably be an increased demand for the best o

The amount received at the Sub-Treasury was \$82,030 ; paid, \$69,940 ; balance, \$3,295,990. The Charleston steamer brought \$5,100

It will be noticed by our market report that there is a larger activity in Cotton, and that considerable quantities are being shipped to Liverpool. In the official amount of Exports for the fiscal year ending 30th June last, as stated in the President's message, the amount of Cotton exported is given at the home valuation. The actual results of these shipments would exhibit a very different total.

The Chicago Democrat says that another dividend will be paid, on the 1st Jan. next, on the principal of the Illinois debt by the Auditor and advises all bondholders to forward their bonds in order that they may participate in it and not be financiered out of their proportion as they were last year.

The manner in which 70 per cent, was then ob tained by a fortunate few may have been very fair Anancial morality but would scarcely pass the scrutiny of a severer school of ethics.

The features of the Dry Goods trade are these of great dullness, moderate stocks and in some cases much reduced and firm prices. The imports from Great Britain continue light. This may be tooked upon as a satisfactory conclusion to the the season, as a decrease in the imports is essential to a sound trade. We learn from Messrs. E. Higgins & Co.'s circular of the 21st November, that the collowing number of packages have been sent forward to this country during the five weeks ending

These tables show a great falling off from last year, except in Worsted Stuff, in which there is a elight increase. Our remarks are necessarily few from the extreme duliness prevailing and the absence of all change. Brown goods are low in stock and firm in price, without any large inquiry. Drills and Sheetings are alike steady. Bleached goods on the centrary are in good supply with little demand, yet at steady prices, owing to the rise in the raw material. Osnaburghs, Denims, Stripes and Tickings are without change : dull without heaviness. Canton Flannels are in fair request and buoyant. Printing Cloths dull but firm. Prints quiet yet held firmly, with light stocks left over; Ginghams inactive. De Laines no longer in active demand. Cloths quiet with a fair stock, and prices rather in favor of the buyer. Tweeds and Jeans and Satinets are in limited request. Sheeps Grays active and steady Linseys are dull and heavy. Blankets are inquired for-Flannels in good demand. Shawls firm, with large sales from second hands, while first hands have nearly sold out. Foreign goods are very inactive; clothiers are buying very sparingly. French goods are more dull than British; prices however are steady. The imports of French goods will be large next season, notwithstanding the sacrifices made in the season just closed. Our jobbers will again import themselves freely.

Having published Mr. Chatfield's circuhar to the country banks, in regard to their arrangements with the Metropolitan Bank, we now give the

other side of the question, frem an answer prepared

other side of the question, frem an answer prepared by a Rochester banker:

Hon. L. S. Chattello, Attorney General—Sir: Your circular of the 25th uit is just received; and in reply I have to say that this Bank has no agent in New York, to "buy in," "purchase," or "take up," directly or indirectly, its circulating notes.

The Metro-colitan Bank receives the notes of this bank from its customers in precisely the same way that it receives the notes of all other banks of this State. We have not given that bank any directions whater er on the subject, and have nothing to do in fixing the rate or terms upon which they receive our own or the notes of any other banks. It is a matter entirely between that bank and its customers. Notwithstanding we are not guilty of the alleged Liberality, we must beg leave to dissent from your construction of the act in question. At the time of the passage of the law, country bank notes were selling in New-York and Albany at a discount of the 2 p cent., and the whole object and intent of the net was to reduce the rate of discount. Banks were therefore, required to appoint an agent in New-York or Albany to redeem their circulating notes at a discount not exceeding it p cent. At the last session of the Legislature the act was so amended as to reduce the rate to i p cent.

The 9th section to which you refer simply says that "nothing in this act contained shall be so constructed as to authorize any incorporated bank, banking association, or individual banker, to purchase, buy in, or take up, directly or indirectly, their circulating notes, at an amount less than what purports to be due thereon, at any other place or in any other manner than is directed in and by this act."

Before the passage of this act there was no law

Before the passage of this act there was no law applicable to this bank, prohibiting it from purchasing its own notes; and all this 9th section amounts to is, that the act of May 4, 1840, shall not be so constructed as to authorize, of itself, Banks to purchase their notes otherwise than is therein provided. If we had the right before the passage of this act, we of course still have it. But admit, if

vided. If we had the right before the passage of this act, we of course still have it. But admit, if you please, that banks are prohibited from purchasing their notes otherwise than is provided by the act in question, still I cannot think it would be a violation of the law for Banks to appoint their legal agent in Albany, and also redeem their notes at the legal rate in New-York, it being one of the places mentioned, and the very point where the loudest complaint was made at the great discount people were compelled to pay on country bank notes.

Notes of banks redeemed in Albany only—with the exception of those received by the Metropolitan Bank from its depositors—are now selling in New-York at i P cent discount, and at the same time are required by law to be redeemed in Albany or New-York at i P cent. Now. I submit if it would not be carrying out more fully the object and intent of the law if banks should redeem their notes at the legal rate at the two places mentioned in the act, and commendable for them to do so, rather than a warrant for you to threaten proceedings against them. Who, I would ask, are injured, or have ground of complaint? The people who you represent certainly have no reason to complain, and no one is injured, unless it is a few brokers in New-York, who otherwise could purchase more notes at i P cent discount, and send them up to Albany daily, for redemption at I P cent. The brokers are the gainers of the 1 P cent. and the public the sufferers to precisely that extent.

The Diario de la Marina publishes a statement of the value of the trade of Cuba for the past year, from which it appears that the importa-tions reached the sum of \$28,983,227, and the exportations \$25,631,948, making the total amounts over fifty-four millions of dollars. The importations of 1850 exceeded those of 1849 by 10 per cent., and the exportations by 14 per cent. The increase of trade with the United States in one year has been over two millions of dollars. In 1849 the total value of the trade with the United States was \$12,879,552 in 1850, \$15,612,613. The United States now, for the first time, take precedence of every other country having intercourse with the Island of Cuba.
